OBJECTIVE

A skilled AI and Machine Learning enthusiast with expertise in Python, deep learning frameworks, and web development. Seeking to contribute to transforming investment research through innovative AI/ML solutions. Passionate about developing data-driven systems, prompt engineering, and creating impactful proof-of-concept applications.

EDUCATION

Bachelor of Artificial Intelligence and Data Science Engineering, Savitribai Phule Pune University 2026
Relevant Coursework: Machine Learning, Deep Learning, Web Development, Databases, Data Visualization, Prompt Engineering

Diploma in Information Technology, Puranmal Lahoti Government Polytechnic, Latur 2020 – 2023
Relevant Coursework: Computer Networks, Programming, Database Management Systems, Data Analysis

SKILLS

Languages	Python, SQL, JavaScript, C++, Java
Web	HTML5, CSS3, Bootstrap, ReactJS, NodeJS
Databases	MySQL, MongoDB
ML/Data Science	Pandas, NumPy, scikit-learn, Matplotlib, Seaborn, PyTorch, TensorFlow, Keras
Tools	Git, VS Code, Postman, OpenCV, Jupyter Notebook
AI Techniques	Prompt Engineering

EXPERIENCE

Web Development Intern Jan 2024 - Feb 2024
CodeClause (Remote)

- Developed responsive web applications with enhanced UI/UX using HTML, CSS, Bootstrap, and ReactJS.
- Implemented data visualization dashboards to present analytical insights, improving user interaction.
- Collaborated on full-stack development projects, optimizing code for scalability and performance.

Web Development Intern Jul 2022 - Aug 2022
Bright Career Infotech, Latur

- Built an efficient web application for employee data management, reducing data retrieval time by 50
- Designed user-friendly interfaces using JavaScript, HTML, and Bootstrap, improving functionality and aesthetics.
- Contributed to proof-of-concept web applications, integrating data analysis features.

PAPERS PUBLISHED

- **Cryptocurrency Tracker Using ReactJS** Apr 2023
Kulkarni Prathamesh, Sagar Swami, Adityabodhi Gaikwad, Pavan Narsinge
DOI: 10.48175/IJAR SCT-9548k
- **Enhancing Accuracy, Privacy, Ethics In Face Recognition And Detection System** Oct 2024
Adityabodhi Gaikwad, Shruti Ghadge, Pallavi Chavan
IJCRT, ISSN Approved Journal No: 2320-2882

PROJECTS

- **Mileage Predictor (ML Project):** Developed a machine learning model using Python (scikit-learn, pandas, NumPy) to predict vehicle mileage, achieving high accuracy in fuel efficiency estimation.
- **Advanced Object Detection System:** Built real-time object detection models using YOLO, OpenCV, and PyTorch, with optimized performance for diverse use cases.
- **Crop Recommendation System:** Created an AI-driven system using scikit-learn and pandas to recommend optimal crops based on soil, rainfall, and environmental data.
- **Crypto Currency Tracker (ReactJS App):** Developed a web application with ReactJS and CoinGecko API, featuring real-time price tracking and interactive Plotly charts.

LEADERSHIP & ACTIVITIES

- Showcased AI/ML projects at college tech events, demonstrating innovative solutions and networking with peers.
- Attended AI and data science workshops, gaining insights into cutting-edge tools and industry trends.
